1	All the courses are placed in appropriate semester. *	13	1	1

Summary of Feedback Analysis and Action Taken:

Sr. No	Particulars / Action Point	Action Taken
1.	Case discussion and compulsory posting in the hospitals	The faculty who is dealing with the case presentation discusses all the cases with the students in detail. All the students are posted in the various multispecialty hospitals.
2.	Artificial intelligence in Medical Technology	A 2 credit course of Artificial Intelligence has been added in the M.Sc. Medical Technology Program
3.	Provide more lectures from doctors	The mentors of the students who are doctors in different hospitals are invited to take the lectures.
4.	More Instruments for practical	For practical students are sent to different hospital where they get in depth knowledge of all the instruments and equipments available in the hospitals
5.	Specialization lecturers, clearing some doubts related to syllabus	Every student has been allotted a guide who is the doctor and he/she takes the responsibility of theory and practical knowledge of the students. Other than the guides we invite some doctors for guest lectures and have visiting faculty available for clearing the doubts of the students.

Sr. No	Particulars / Action Point	Action Taken
1.	I guess there should be no partiality among students. Faculty should improve their self to avoid favoritism. Same rule for everyone. And upgrade the syllabus for better implementation.	There is no place for favoritism at all in SIHS. All are treated equally and no such complaint has been received. The syllabus has been reviewed and updated.
2.	Fixed college hours so that students should spare time for Industry Training. Such as 8:00 a.m. to 1:00 p.m. for college and 2:00 p.m. to 6:00 p.m. for Industry training.	The students spend most of their time in the hospital with their guides for theory and practical knowledge. Students are called to the SIHS campus only if there is any didactic lecture or any form of examination.
3.	Students should prepare articles for submissions to Scopus listed peer reviewed journals.	We have mandated it for every M.Sc. student to publish an article in SCOPUS listed journals. The degree will be awarded to those students who will successfully publish at least one paper in SCOPUS listed journals.

	<p>Use of AI in health care, Basics of AI and Basics of computer programming. Better research guidance, more medical specialists interaction, more clinical practice More practical hands on with interactive learning Proper lectures for the main subjects rather than the common subjects would be helpful for students. One cannot rely on self-study only. Students need guidance in Learning about the course. In addition, after paying huge fees, having proper lectures and teaching facility is something one would expect as a default. Have sessions for the students to go and have a proper view of the types of options that are available to them once they graduate from the course. Have industrial meet and greet for students to understand what the needs of the industry are. Faculty to students' interaction need to be increase.</p>	<p>Ophthalmic Sciences has been introduced as new specialization at B.Sc. Mt program. Better research guidance. Improved monitoring for 'Hands-on' training during Hospital training postings. Modifications in implementation to foster better learning environment. Better placement guidance & support.</p>
